

## RoHS Declaration

Shreejee Electronics is committed to keeping all ten hazardous substances, per Annex VI in the RoHS Directive 2011/65/EU, also known as RoHS 3, out of the marketplace and restricting their use in our production facilities.

Based on the information provided by our supply lines and specific knowledge about our processes, we have determined that our products produced on or after April 30th, 2018, are all in full compliance with 2015/863/EU. None of the ten restricted substances are present in our standard catalog products we offer to the marketplace in concentrations greater than those specified in the directive.

Customer orders which explicitly required soldering with lead-tin solder have been the sole exceptions to our RoHS compliance statement.

The confirmation of compliance status by our supply lines is granted for products that do not contain any of the ten restricted substances with higher than maximum concentration values tolerated by weight in homogeneous materials.

The Company has taken all reasonable steps to verify the supply line information regarding the absence of the restricted substances.

n.b. Exceptions for lead (Pb) subject to 2011/65/EU Annex III.
